The Canine Good Neighbour Program

Welcome to The Canadian Kennel Club (CKC) Canine Good Neighbour (CGN) program. The CKC Canine Good Neighbour program identifies and rewards responsible and caring owners and their canine partners.

The purpose of the Canine Good Neighbour Program test is to ensure that one of our most favoured companions, the dog, is accepted as a valued member of the community. Canine Good Neighbours can be counted on to present good manners at home, in public places and in the presence of other dogs.

Canine Good Neighbour training is fun, rewarding, and useful, and can enable owners to achieve a better relationship with their dogs.

The objectives of the CKC Canine Good Neighbour program are three-fold:

1. To increase awareness and appreciation of dogs as valued, contributing members of society.
2. To assist in teaching and promoting responsible dog ownership.
3. To certify that dogs conduct themselves in a manner, which is reliable and trustworthy in situations encountered in everyday living, be it around people, at home, in public, or in the presence of other dogs.

The program embraces both purebred and mixed-breed dogs and has been created to assist canine owners combat anti-dog sentiment which often targets dogs as a whole. Additionally, the program enhances community awareness of responsible dog ownership and the benefits associated with dog ownership.

The test is not a competition calling for precision performance by the handler and dog. Rather, it assesses the handler and dog's relationship together with the handler's ability to control the dog. Dogs are evaluated on their ability to perform basic exercises as well as their ability to demonstrate good manners in everyday situations.

The Canadian Kennel Club encourages all dog owners to participate in this program, thereby ensuring that our beloved canines are welcomed and respected members of our communities.

Evaluator Requirements

In order to become a Canine Good Neighbour Certified Evaluator, an individual must be accredited by The Canadian Kennel Club and have met the criteria for this position. The Certified Evaluator is responsible for the overall operation of the test. The evaluator checks to ensure that all appropriate equipment is available, delegates responsibilities to assistants and generally ensures that the test runs smoothly and efficiently.

A CGN Certified Evaluator has the duty of ensuring that each participant has an experience that is positive, educational and fun.

To become a certified evaluator, the following criteria must be met:

- Be a regular member in good standing with the CKC
- Have at least 5 years experience in the training and handling of dogs
- Be a member/participant in a dog club or dog association

Evaluators must possess a strong understanding of dog behaviour and awareness of a dog's role in society and society's attitude towards dogs. Therefore evaluators and instructors must have backgrounds in obedience, conformation or fieldwork. In addition, their backgrounds may include training therapy dogs or working in animal shelters. Once an individual has been approved, a written test must be taken and passed. CGN Evaluators will be monitored in their respective zones, by members of Council as well as qualified individuals appointed by Council in all of the zones.

General Test Information

- a) The CGN Tests are sponsored by local dog clubs, private dog training schools, pet therapy societies, community colleges, service organizations, pet supply stores, and some veterinary clinics.
- b) Tests will be conducted inside or outside in everyday, busy locations such as shopping malls, hotels, community centres or parks. **They are not conducted in quiet locations such as regular dog training halls.**
- c) The tests will demonstrate that a dog can respond to such commands as "sit", "down", "stay", "come" and "heel" and that they can be put into practice every day. A handler must work with a dog to achieve a response to these commands.
- d) The evaluator assigns ratings to handlers and their dogs on a "Pass" or "Not Ready" basis.
- e) Dogs must be at least 12 months old to participate in the test.
- f) The test is non-competitive. Dogs are not required to have formal obedience training in order to participate in or successfully complete this test.

- g) In order to pass, a dog must satisfy the evaluator that it is:
- One whose behaviour would be acceptable in one's home.
 - One who would be welcomed as a neighbour.
 - One who is well mannered in the presence of a variety of people, dogs and situations.
 - One who is well groomed and allows examination and grooming.
- h) Interaction between handlers and dogs during the tests is encouraged. Handlers may talk to their dogs and quietly assist them to perform the tests. The dogs must be attentive and respond to their handler's movements and words. An occasional tight lead is permitted, but constant straining is unacceptable. Hugs, pats and words of encouragement are welcomed.
- i) Food, toys and other training aids are not permitted during testing.
- j) The CGN program may be used to compliment many other disciplines.
- k) The CGN title does not form part of the dog's official registration papers. It is meant to reward the dog for having good manners, thereby gaining a greater acceptance of it in the community.
- l) While the CKC encourages all dog owners to participate in this program, the CKC is not responsible for conducting a CGN test, or for any subsequent behaviour of tested dogs.

Guidelines for Evaluators

The Canadian Kennel Club Canine Good Neighbour certification is an important method of demonstrating to everyone that dogs can be welcome in modern society.

In certifying that a dog is a "Canine Good Neighbour" evaluators should be mindful that they are also ambassadors for responsible dog owners and dogs that can be trusted to exhibit good manners everywhere.

Certified Evaluators should be familiar with teaching and managing dogs in a variety of circumstances, particularly as pets that are treasured members of a family.

Certified Evaluators should be well acquainted with a variety of breeds of dogs and their behaviours, in order to learn what is normal, and what is unacceptable. They can acquire knowledge in a variety of ways: through talking with others who work with dogs in a variety of ways, especially dog breeders and trainers, attending seminars, and reading widely.

All evaluators must follow the test steps as outlined in the guide. The tests must be run individually and not in groups and no more than one test taking place at a time.

Certified Evaluators also need to understand how their own body language is crucial in dealing properly with dogs. They need to practice their skills by working with and training a variety of purebred and mixed breed dogs.

Additionally, Certified Evaluators need skills in dealing with people. Often a dog's behaviour is dependent on that of its handler, and an evaluator must be able to deal effectively and positively with handlers having a wide range of skills.

Certified Evaluators need to be aware of society's demands upon owners and their dogs, and be able to recommend how dogs be managed in a manner that satisfies others as well as the owner.

Ratings

All evaluator decisions are final.

PASS: The handler/dog team has earned the title of Canadian Kennel Club Canine Good Neighbour and will receive a certificate attesting to this accomplishment.

NOT READY: The handler/dog team assessed as "Not Ready" may participate in future tests.

Any of the following behaviours will result in a rating of "Not Ready":

- Dogs sniffing excessively, so as to interfere with appropriate walking on a leash
- Handlers who use force or an excessively loud voice in an attempt to control the dog
- Dogs exhibiting excessive shyness
- Dogs barking or vocalizing excessively
- Dogs urinating or defecating during testing
- Dogs charging ahead of the handler during the Walk Through a Door/Gate test (Test 12)

DISQUALIFICATION

A dog that displays unruly behaviour at any time will be immediately disqualified and removed from the test area. Unruly behaviour is defined as aggression, growling, or lunging at people and/or dogs, biting or attempting to bite and fighting. A dog that has been disqualified can be retested at a later date.

Handlers who shout or mishandle their dogs will be cautioned that such conduct is not acceptable and will not earn certification if such handling continues.

Handlers of dogs, which receive a “Not Ready” rating, will be encouraged to continue working with their dogs and given tips on how to improve the dog’s performance.

Heavy collar pressure or jerking on the leash or collar to maintain control is not acceptable and will be rated as “Not Ready”.

Neither food nor toys or other training aids may be offered or carried during testing. A treat after the test has been completed is acceptable.

Certification

Dogs are rated as “Pass” or “Not Ready”. The Canadian Kennel Club issues certificates for dogs rated “Passed”. Once the test is completed, the sponsoring organization will submit to the CKC the Registration/Evaluation form along with the certification fee for each dog that passed. The Canadian Kennel Club will issue certificates for all dogs that pass the test whether they be pure-bred or of mixed breed.

There is no expiration of CGN certification. It is hoped that the knowledge gained relative to responsible dog ownership will last a lifetime. There is no guarantee that a dog will continue to behave in the manner required to obtain the CGN for its entire life. It is important for owners to continue to work with the dog long after the test date has passed, not only to maintain peak performance, but for the satisfaction of both owner and dog.

Feedback to Participants

As an evaluator, you are expected to provide each participant with positive and constructive feedback regardless if they pass or are rated “Not Ready”. Statements will be as simple as saying, “Congratulations! Your dog passed all 12 tests”. In cases where a dog is rated as “Not Ready”, all comments and feedback should be positive. For example, an evaluator may say, “Your dog did a great job. She passed all tests except Number 7. She could learn to “come” in a few lessons. I hope that you will work on this and bring her back.”

Feedback should be given to each participant immediately following the completion of the test so that each can be recognized individually, or given further encouragement. We discourage having participants sit and wait.

Timing

On average, 5 to 8 dogs per hour can be evaluated. Evaluators need to balance time between running an efficient test and spending enough time with each participant so as to make the test a worthwhile and educational experience. **All evaluators must follow the test steps as outlined in the guide. The tests must be run individually and not in groups, and no more than one test taking place at a time.**

Required Equipment and Material

The handler is required to bring the following equipment to the test:

- Proof of vaccination certificate
- Dog license (If required by local dog control by laws)
- Test fee
- A leash not less than .75 meters (2') and not longer than 2 meters (6') in length
(Acceptable collars include a well-fitting slip, buckle or martingale collar, made of fabric, leather or chain. All other types of collars are unacceptable.)
- A grooming tool -- either a brush or comb
- A plastic bag for picking up after your dog
- A copy of the current CGN Test Steps.

A dog should be tested wearing its normal walking equipment, such as a well-fitting slip, buckle, or martingale collar, made of nylon/fabric, leather or chain. Specialized training tools such as pinch collars and head halters are not acceptable for the test.

The handler is also required to bring a suitable leash, grooming equipment (brush or comb), any required vaccination and license certificates, and the information needed by The Canadian Kennel Club in order to issue a certificate. Evaluators should determine beforehand what requirements are mandatory in a particular municipality.

Required Test Materials

The Sponsoring Group will provide the following:

- Registration/Evaluation forms
- Pens
- Spare grooming tools
- Leashes - 5 to 6 meters (15 to 20') leashes (2 different snap sizes to accommodate large and small collar rings)
- Stopwatch
- Distraction items (Test 10)

- Clipboards
- A copy of the current CGN Test Steps

The Sponsoring Group will also provide the following if needed:

- Cash box and float
- Water
- Spare leashes
- Spare collars
- Plastic bags
- Paper towels
- Disinfectant and Hand Sanitizer
- Table and chair(s)
- First aid kit
- Canine first aid kit

Three to 5 assistants will be required to assist in performing registration and testing, including a handler with a well-behaved dog for Test 9 (Reaction to a passing dog) and an individual to hold the dog for Test 11 (Supervised isolation). To create a “crowd” for Test 5 (Walking through a crowd), several by-standers or assistants will be required.

Approximately one hour before the scheduled start time, the Evaluator should walk the test site in order to ensure the area is satisfactory and is a safe environment. At this time, the assistants will be assigned their responsibilities.

Unruly Behaviour

Any dog that displays unruly behaviour at any time is to be automatically disqualified and immediately removed from the test area. Unruly behaviour is defined as aggression, growling, or lunging at people and/or dogs, biting or attempting to bite and fighting. A dog that has been disqualified may be retested at a later date.

Usually a dog jumping on people or other dogs will be rated “Not Ready”. However, since some handlers invite their dogs to jump on them as a reward and sign of affection, the evaluator may accept a dog jumping on the handler if it is felt that the dog’s behaviour is under control.

Handlers with Disabilities

The CGN program welcomes and encourages handlers with disabilities to participate in the Canine Good Neighbour program. In the case of a handler with a disability, the evaluator may use discretion in making minor changes to the tests, but the dog must perform all of the tests to a qualifying standard in order to pass.

Obtaining Test Materials

Test kits complete with posters, Evaluation/Registration forms, Evaluator Guides and Participant Handbooks are available for purchase from the CKC. The kits are available for 25, 50, 75 and 100 dogs. Items may also be purchased individually.

For prices and to order your kit contact:

CANINE GOOD NEIGHBOUR TESTS

Accepting a friendly stranger

This test demonstrates the dog's ability to allow a friendly stranger to approach and speak to the handler in a natural, everyday manner.

NOTE: Tests 1, 2 and 3 may be combined to flow from one to the other.

Each of the 12 steps of the test must be done individually. Only one dog can be tested at a time and the running of more than one test at the same time will NOT be allowed.

Description of Test

The evaluator will walk toward the handler and dog and greet the handler in a friendly manner, shake hands with the handler and ignore the dog. The evaluator is assessing that the handler is in control of the dog and that the dog is not threatened by the approach of a stranger.

Handler and Dog

1. As the evaluator approaches, the handler may tell the dog to sit and quietly reassure the dog.
2. The handler may not hold the collar tightly or in any other way restrain the dog.
3. While it is not necessary for the dog to be sitting, it is important that the dog does stay in place, and does not move toward or interfere with the evaluator.

Dogs that exhibit the following will be rated as "Not Ready":

- The dog displays an overly exuberant attitude.
- The dog leaps or attempts to leap up on the evaluator.
- The dog hangs back or tries to avoid the approaching evaluator.
- The dog exhibits fearfulness, resentment or shyness.

Politely accepts petting

This test demonstrates the dog's ability to allow a friendly stranger to pet it while it is out with its handler.

This test is a natural progression from Test 1. In most instances, when encountering a friend or acquaintance with a dog, the dog will be included in the conversation and will usually be petted.

Description of Test

The evaluator will request permission to pet the dog and will then proceed to pet the dog on the head and shoulders. The evaluator is assessing whether the dog remains calm while a stranger pets it.

Handler and Dog

1. The dog is to be sitting beside the handler (either left or right side is acceptable).
2. The handler may talk to his/her dog throughout the exercise.
3. The dog does not have to maintain the sitting position but must remain in place.
4. If the handler commands the dog to sit and the dog does not respond, the handler may lightly touch the dog on the hindquarters but may not physically force the dog into a sitting position.
5. The handler may not physically restrain the dog either by use of the collar or any other method.

Dogs that exhibit the following will be rated as "Not Ready":

- The dog is not steady when a stranger pets it
- The dog attempts to jump up
- The dog exhibits resentment or shyness
- The dog pushes into or heavily leans into the evaluator, is over friendly, highly exuberant, or rolling over in a submissive nature at the evaluator's feet.

NOTE: The evaluator should act in a natural, relaxed manner and should avoid making excessive eye contact with the dog or show hesitancy while petting the dog.

Appearance and grooming

3

This practical test demonstrates that the dog will accept being groomed and examined and will permit a stranger to do so, such as a veterinarian, groomer, friend of the owner etc. It also demonstrates the owner's care, concern and sense of responsibility for his dog's well being.

Description of Test

The evaluator will ask for the grooming tool before the test begins. The evaluator will inspect the dog to determine if it is clean, groomed, appears in good health and in good weight. The evaluator will lightly examine the ears, eyes and each front foot of the dog and softly comb or brush it on the body. The evaluator will then walk behind the handler and dog, returning to face the team. The evaluator is testing for shyness and/or resentment.

Handler and Dog

1. The handler will provide the evaluator with the grooming tool before the test begins.
2. The dog is not required to maintain a sitting position.
3. The handler may encourage the dog during the test.
4. The handler may use light collar pressure in positioning the dog, but no physical restraint.

Dogs that exhibit the following will be rated as "Not Ready":

- The dog exhibits shyness or resentment.
- The dog is not clean, well groomed, does not appear healthy or in good weight.

NOTE: The evaluator should gently cup one hand under the dog's jaw and against the voice box area and should maintain such contact throughout the examination in order to be able to detect any growling as the dog is being lightly touched. Once an evaluator has established contact with the dog, the hands should not lose contact, but rather should continue to move smoothly over the dog's body. When moving from one front leg to the other, the evaluator should continue to maintain a light touch while moving one's hand over the dog's shoulder area and down the opposing front leg. Back, hind legs and croup should be touched as well.

Out for a walk

This test demonstrates the ability of the dog to walk politely on a loose leash as well as the handler's ability to control the dog.

Description of Test

At the beginning of the test, the evaluator will indicate to the handler the area in which they are to walk. The handler will walk in a straight line, demonstrating at least one right and left turn as well as a 180-degree turn. The evaluator will be assessing the dog's ability to walk quietly near the handler without pulling the leash taut. The evaluator will note that the dog responds to the handler's changes of direction.

Handler and Dog

1. The dog may be on either side of the handler.
2. The handler may speak quietly to the dog throughout the test.
3. The dog is required to walk near the handler without pulling or straining.
4. The leash should be loose in order to demonstrate that the dog is under control and is not being steered by the handler.
5. The handler and dog are required to walk a straight line, make at least one right and one left turn as well as a 180-degree turn.
6. The dog is not required to sit when the handler stops walking.

Dogs that exhibit the following will be rated as "Not Ready":

- The dog does not respond to the handler's movements and changes in direction.
- The handler must pull the leash taut to control the dog.
- The dog does not walk quietly without restraint.
- The dog is not attentive to the handler.

Walking through a crowd

This test demonstrates the dog's ability to walk politely beside the handler in pedestrian traffic while remaining under control at all times.

NOTE: The requirements for this test are the same as test 4, except the dog may only show mild interest in the strangers.

Description of Test

The evaluator will instruct the handler to walk with the dog (on either the handler's left or right side) through and by a group of several people (at least 5). The evaluator is assessing the dog's ability to maintain a position close to the handler without being unduly stressed or becoming unruly, as well as the handler's ability to control the dog.

Handler and Dog

1. The dog should remain on one side of the handler for the duration of the test.
2. The dog is not required to maintain a heeling position beside the handler but may not be so far ahead or behind the handler as to create an impediment to individuals walking by.
3. The handler may talk to the dog and provide verbal encouragement and praise during the test.
4. The handler may not steer the dog with the leash.
5. The dog may show mild interest in the strangers but should not go to them.

Dogs that exhibit the following will be rated as "Not Ready":

- The dog displays more than mild interest in the strangers or goes to them.
- The dog is straining on the leash and excessive exuberance.
- The dog exhibits shyness, resentment or is jumping.
- The handler is unable to control the dog.
- The dog becomes stressed or unruly.

Sit/Down on command and stay in place (long line)

This test demonstrates the dog's ability to respond to the handler's commands to sit and down and to remain in place on command.

NOTE: Tests 6 and 7 require the use of a long line provided by the sponsoring organization.

Description of Test

The evaluator will provide the handler with a 6 meter (20') line, which the handler should attach to the dog's collar prior to the commencement of the test. The short leash should be removed once the long line is attached, and the long line should be on the ground stretched out in front of the dog and lightly held with no tension by the handler for security. The evaluator will ask the handler to place the dog in a SIT first, then in a DOWN position, to see if the dog knows the commands and will respond to the handler. The evaluator will then ask the handler to choose either the SIT or DOWN position, then command the dog to STAY, and walk to the end of the long line. The handler will turn to face the dog, and promptly return to the dog. The evaluator is testing for the dog's response to basic commands.

Handler and Dog

1. The handler may take a reasonable amount of time and may use more than one command to sit or down the dog.
2. The handler may gently touch the dog in an effort to assist the dog in assuming either the sit or down position.
3. The handler may not physically place or force the dog into position. The handler may repeat a command and use signals and gestures to assist the dog as well as a light touch.
4. Once prone, the dog must remain in place.
5. Once the dog is in either the sit or down position, the handler is to command "stay", then walk away from the dog to the end of the long line.
6. Once reaching the end of the long line, the handler will turn to face the dog and without pausing return to the dog.
7. The handler is not required to walk behind the dog in returning to heel position
8. The handler is not required to wait for the evaluator to indicate an end to the test after he returns to the dog.

Dogs that exhibit the following will be rated as “Not Ready”:

- The dog does not respond to basic commands of sit or down.
- The dog does not obey the command to stay in place.

Come when called (long line)

This test demonstrates the dog’s ability to come when called by the handler.

NOTE: Tests 7 and 8 may be combined so as to flow from one to the next.

Description of Test

The long line remains attached to the dog’s collar and should be on the ground stretched out in front of the dog & lightly held with no tension by the handler for security. The evaluator will stand near the dog and instruct the handler to position the dog in either a sit, down or stand position. The handler will command the dog to “stay or wait “ and then will walk a distance of 3 meters (8 – 10’), before turning and calling the dog. When called, the dog must come close enough for the handler to touch it. The evaluator is checking whether the dog will remain where left and will respond quickly to the handler’s command to come.

Handler and Dog

1. The dog may change position, but must remain in place when waiting for the command to come.
2. When called, the dog must come at a reasonable speed without stopping to sniff or wandering off.
3. The dog may drop its head to sniff, but must continue towards the handler.
4. The dog must come close enough for the handler to touch it but is not required to sit.
5. The handler may use body motions and verbal encouragement.

Dogs that exhibit the following will be rated as “Not Ready”:

- The dog does not remain in place when the handler walks away.
- The dog does not come on command at a reasonable speed.
- The dog sniffs or wanders off (It is acceptable if the dog drops its head to sniff, but continues toward the handler.)

Praise/ Interaction

This test demonstrates that the dog can be easily calmed following play or praise.

Description of Test

The evaluator will instruct the handler to command the dog to “Come”, and then to commence a play session with the dog. After about 10 seconds of play, the evaluator will then instruct the handler to calm the dog. The evaluator is assessing both the handler’s control of the dog and the dog’s ability to respond quickly to the handler’s command to settle.

Handler and Dog

1. The handler may use any combination of verbal praise, and playful postures, gestures or actions to engage the dog in play or in the performance of tricks.
2. When calming the dog, the handler’s voice may be firm but must not be loud or angry.
3. The handler may use more than one command to calm the dog but the dog must display an attitude of controlled behaviour following calming efforts on the part of the handler.

Dogs that exhibit the following will be rated as “Not Ready”:

- The handler is using forcible leash pressure to calm the dog.
- The dog does not settle quickly.
- The handler does not have control of the dog.

NOTE: The evaluator should watch for the response of the dog to the handler’s efforts to engage it in play. Dogs are not required to respond in any preset manner, however, they must be aware of their handler and interact.

(After Test 8, the handler should reattach the short leash to the dog’s collar before removing the long line and returning it to the evaluator.)

Reaction to passing dog

9

This test demonstrates the dog's polite behaviour while in the presence of other dogs and handlers.

Description of Test

The test is set up using another handler/dog team that is not being evaluated. This team is placed 6 meters (20') from the handler and dog being tested. The handlers and their dogs will approach one another, stop, shake hands, briefly chat and continue on past each other for approximately 2 meters (6'). The dog being tested should exhibit no more than casual interest. The evaluator is assessing behaviour on the part of the dog and the handler's control of the dog.

Handler and Dog

1. The handler should command the dog to heel before beginning to walk toward the other handler/dog team.
2. Upon reaching the other team, the handler should command the dog to sit, thereafter greeting the other handler and chatting briefly.
3. The dog may not be restrained.
4. The dog may show mild interest in the other handler and dog but may not move toward the other dog, or exhibit shy or aggressive behaviour.
5. The handler may use additional commands to ensure a response from the dog but may not jerk or grab it.

Dogs that exhibit the following will be rated as "Not Ready":

- The dog does not respond to the handler's instructions.
- The handler is forced to jerk or grab the dog.
- The dog moves toward the other dog.

NOTE: The dog being used as the distraction must be well behaved. If it is not well behaved, the evaluator should retest the test dog with another distraction dog.

Reaction to distractions

This test demonstrates that the dog is confident at all times when faced with common visual and auditory distractions found in everyday life, such as the sudden opening or closing of a door, crutches, wheelchair, baby stroller, loud noises, etc.

Description of Test

The evaluator will instruct the handler to begin walking with his dog on a loose leash beside him. Several people will walk by in any direction using one or more distractions. The distractions will not be an attempt to frighten the dog, but rather something the dog encounters in everyday life, such as baby strollers, walkers, canes, someone carrying a ladder, etc. The evaluator is observing the dog's reaction to the distractions as well as the dog's response to the handler's commands.

Handler and Dog

1. The handler may command the dog to walk at heel while the individuals walk by.
2. The handler may speak encouragingly to the dog, but may not steer the dog with the leash nor attempt to restrain the dog.
3. The dog may startle but should recover quickly.
4. The dog may express natural interest and curiosity.
5. The dog may bark once or twice.

Dogs that exhibit the following will be rated as "Not Ready":

- The dog shows panic, tries to run away or shows aggressiveness.
- The dog does not respond to the handler's commands.
- The dog shows fear.
- The dog continues to bark.

Supervised isolation

This test demonstrates the dog's ability to be left alone with a trusted person other than its handler, while maintaining a calm acceptance of the situation.

Description of Test

The handler will walk with the dog to a designated person (assistant evaluator), and hand over the leash. The handler may command the dog to sit or lie down and wait/stay. Then the handler will leave the area and go to a predesignated location, out of sight of the dog. The handler will wait 2 minutes until called to return by the assistant evaluator. The evaluator is observing the dog's ability to maintain good manners when left alone with another person. The dog may show some mild stress, but should not bark, pace or pant excessively. Neither should the dog attempt to climb up on the assistant, nor pull away. (If the dog should become excessively agitated, the evaluator will call the handler back before the time required, and the dog will be judged "Not Ready.")

Handler and Dog

1. The dog does not have to maintain position or place with the assistant evaluator.
2. The dog may not show signs of excessive stress.
3. Mild stress or nervousness is acceptable behaviour.

Dogs that exhibit the following will be rated as "Not Ready":

- The dog attempts to climb on the assistant evaluator.
- The dog continually barks, whines, howls, paces, and pants excessively.
- The dog pulls on the leash in an attempt to get away.

NOTE: The evaluator may allow some nervous behaviour on the part of the dog. However, any signs of excessive stress and anxiety is unacceptable behaviour.

Walking through a door/gate

This test demonstrates the dog's response to the handler's commands as well as the handler's ability to control the dog in a restricted area while moving ahead of the dog and through a door/gate.

Description of Test

The handler will command the dog to sit and wait. The handler will then walk through the opening (door/gate). Once through, the handler will instruct the dog to walk through the opening and return to the handler's side. Alternatively, if the opening is large enough for the two of them to pass through simultaneously, then the handler may instruct the dog to maintain a steady position beside the handler as they walk through the opening together. The evaluator is assessing the dog's ability to respond to commands from the handler as well as the handler's ability to control the dog in a restricted area.

Handler and Dog

1. The handler may talk quietly to the dog as they approach the opening.
2. If walking through the opening simultaneously, the dog should maintain a loose leash throughout and should not lunge forward in an attempt to pass through ahead of the handler.
3. In the event the opening is too small, the handler may quietly command the dog to wait (or sit and wait) while the handler walks through.

Dogs that exhibit the following will be rated as "Not Ready":

- The handler does not have control of the dog or jerks the dog in an attempt to maintain control.
- The dog does not obey the handler's command.
- The dog lunges or charges ahead of the handler.
